New Line of Highly Textured Dura Stone® Colors

Twelve New Colors in Designer Series™

TUCSON, AZ—July 5, 2007—ACS International, Inc. releases a new line of Dura Stone colors, called the Designer Series. This color series is designed to look more like natural stone rather than appear like a synthetic material. This was achieved through the use of ultra translucent fillers, new component colors, and tighter patterns than have ever been used previously.

“The new Designer Series of Dura Stone consists of twelve granite effect colors dramatically different than other colors in the current product line—or what is offered by the competition” says Angela Kliever, Director of Marketing for ACS International, Inc. Ms. Kliever goes on to say that “The ACS color experts have followed color trends across several industries in the development of this new color line and we’re very pleased with the results.”

Dura Stone solid surface fillers are used in residential and commercial applications including counter-tops, bars, vanities, wall panels, tub and shower surrounds, rest room partitions, and laboratory surfaces. Cast and then sanded to expose the chip definition.

About ACS

Established in 1988, ACS International, Inc. is a privately owned company located in Tucson, Arizona. The facility includes crushing and blending equipment along with a comprehensive laboratory, ensuring quality control and advancements in research and development in all our product lines,.
