### New Poly Stone Colors

**TUCSON, AZ—October 11, 2006**—ACS International, Inc. releases ten new **Poly Stone™** colors. Poly Stone is a spray or cast cultured granite material designed for a variety of in- and out-door surface applications that use molds. When sprayed Poly Stone can be backed with calcium carbonate, ATH, Featherlite®, or used with fiber reinforced plastic products.

In addition to the new color release, ACS has divided the Poly Stone product line into two color categories— *Classic Design Series* and the *Premium Design Series*. The Classic Design Series is comprised of colors with smaller chip patterns in 40 standard colors. The Premium Design Series includes colors with a combination of small and large chips that allow for spray applications. The later series is available in 35 standard colors.

“The new colors reflect warm natural tones that design trends are reflecting in today’s market” says Angela Kliever director of marketing for ACS International. “In addition to complementary colors for the home, we’ve added more texture to our Poly Stone line with nine of the new colors using larger chips for spray applications for added depth-of-color.”

#### About ACS

Established in 1988, ACS International, Inc. is a privately owned company located in Tucson, Arizona. The facility includes a comprehensive laboratory, ensuring quality control and advancements in research and development in all our product lines. ACS manufactures a broad range of products including; GraniteFX™ textured silicone, Poly Stone™ spray granite, Dura Stone® a solid surface filler, Poly Chips® a solid surface chip(s) component, Granite Fill 2000 a natural mineral based cast granite filler, Featherlite® an ultra-light series of fillers, and Alumina Tri-Hydrate in white grade/off-white custom blends.
